PRESIDENT'S REPORT

After Melbourne's long cold and wet winter, we've since been enjoying a few days of sunshine. The hint of spring, encouraged me to do some planting in my vegetable garden.

Before our last meeting, we were sorry to hear that our "Sound & Video man", Stefan Bock had been admitted to hospital for a lengthy period. We had no idea when he might be back at the DSV. Many of us had sent him distant healing to add to the medical treatment he was receiving in hospital.

It was great that Tony Hill, our Sound & Video expert of many years, kindly agreed to come along after the microphones and recording. Everyone was so pleased to see his smiling face again.

It came as a complete and happy shock though when Stefan himself arrived. He had only been discharged from hospital a week earlier. Be great to see you at our next meeting. Feel free to bring your friends!

Lyn Wood, President

OUR LAST MEETING

Angelo Eliades presented at our August meeting and was very popular.

He explained that he'd been medically trained, had worked in corporate finance and had been involved as a corporate technical writer in IT. So it was a complete turn about for someone so methodical to embrace sustainable gardening and permaculture as well as many esoteric things.

DSV PURCHASES BY CREDIT, DEBIT OR TRANSFERS

We regret to say that we're not able to offer purchases using the magical Square electronic payment service - from now until further notice.

We've just discovered that this option isn't actually easily available to Not For Profit organisations like the DSV - yet.

TREASURE MAPS

Thanks to DSV Committee Member, Bev Ellison, for her article.

I wonder if you have heard of a "Treasure Map" (not the pirate type) or perhaps a "Vision Board"? These boards are a visual representation of the things you most want in your life, including people,

opportunities, money, material objects, or experiences that are fun or that challenge you to grow. Or they can even represent a particular value that is important to you like health and beauty and can also reflect a quality you intend to develop like courage, worthiness and/or patience, etc.

I first read about this technique many years ago. I picked up a book called "Creative Visualization by Shakti Gawain" back in the 1980's. It's still available today.

To me the key to all this, is you have to be very specific in what you want and if you want it badly enough you will get your desire.

How to Create a Treasure Map

- Project cardboard from a newsagent
- Collection of old magazines
- Scissors and glue

Before cutting out the pictures you want, I suggest getting out your pendulum and ask "is this what I really want?". "Is this in my best interests?" Then continue to use your pendulum to help put your treasure map together in order to get the best out of it.

I hope that you find this article of interest and put it to good use. Maybe you can give us some feedback on how it has worked for you. Trust me, this really does work.

Integrated effective healing
