DSV philosophy: Through awakening consciousness, we are empowered with knowledge and skills to unconditionally serve others.

**NEXT MEETING
Sunday 20th June 2010**

PRESIDENT'S REPORT

Recently my husband Phil and I enjoyed a week's holiday at Phillip Island. We did the usual tourist things – went to the koala sanctuary and the Nobbies, watched the penguin parade and visited Churchill Island. In the past those who owned this island over the years, always had the best interests of the land and the animals. Now it's owned by the Victorian Government and the rangers are keeping up the same fine traditions. We enjoyed soaking up the wonderful energy there.

As part of the penguin parade, we had an Eco tour, and learned about the history and habits of the penguins. The ranger mentioned the shearwaters – seabirds who also inhabit the area. Apparently the parents migrate to the Aleutian Islands near Alaska, leaving their chicks behind in burrows until they're able to make the 16,000km journey later themselves. It seems incredible that those chicks manage so well, without any parental guidance to help them learn to fly and make such a spectacular migration over such a huge distance. Their instincts seem to work like powerful, inbuilt intuition.

A short-tailed shearwater

When we dowse we use our intuition, but most of us need tools to indicate what our collective bodies know naturally. Some experienced dowsers know an answer just as they form a question, with answers confirmed by their dowsing tools. Before using your own tools, why not stop for a moment to see if your body indicates the answer. You might sense or hear a message, or have a physical sensation. Check for "yes" and "no" responses to practice. Another way to do it is to let one arm drop straight down at your side, then watch to see whether it will swing like a pendulum in response to a question.

Winston Churchill said "all people are offered help by their Intuition – but most pick themselves up and escape as fast as is possible!" Let's listen and see what happens instead.

At our April AGM we were sorry to farewell Anne Smith from the Committee as we'll miss her many valuable contributions. Meanwhile we welcomed a new member, Tony Hill and look forward to having him work with us. I'm pleased to say that all other members chose to continue and I was once re-elected as your President.

Lyn Wood, *President*

NEXT MEETING

Time & Date:
2.00 pm, Sunday 20th June 2010
(1.30 pm for dowsing practice)

Place:
Mount Waverley Community Centre,
Miller Crescent, Mount Waverley
(Opposite Mount Waverley Railway Station)
Melway: 70 E 1

**Parking at rear, off Holskamp St. which runs off
Stephensons Road**

OUR NEXT MEETING

We have a happy surprise in store for our next DSV meeting on Sunday 21st June.

Instead of a designated speaker, we will showcase some of the many ways you can use dowsing with different methods for particular situations.

We'll set up a number of tables, each exhibiting dowsing in a particular way. For example, we'll have one table where map dowsing will be demonstrated, giving you the chance to ask an experienced map dowser some of the ins and outs of the best ways to approach this. There'll be another table set aside to show how to test for the quality of food, the benefit to individuals for particular vitamins and the types of healing modalities most suited for a presenting health problem. We'll devote another table to pendulum dowsing for healing, another to highlight the best way to work with rods for aura, and so on.

We featured a similar dowsing exhibit a few years ago and it was very popular indeed. Please bring your dowsing tool of choice and take the opportunity to ask questions.

OUR LAST MEETING

Bernadette Saulenier's presentation about dowsing for health was very well attended and very popular. Her talk was wide ranging across many aspects of healing and how she approaches this so extensively in her own practice as a naturopath, homeopath and reiki/sekh'm teacher.

USING THE DOWSING EFFECT TO CUT YOUR HEATING BILL

By Paul Craddock ©
<http://www.healthyandwise.co.uk>

History

Dowsing can help in many areas and is adaptable to our current needs in these worrying times. And surprisingly, it can be used to increase the temperature of your home thus saving you money on your fuel bills! In 1982 the late A.P. Tabraham published a booklet on Solar Energy & Dowsing in the Isles of Scilly (*off the south west tip of Cornwall, UK*). This was followed by an addendum in 1992. The booklets document the research and methods used by farmers to raise the soil temperature in order to get their flowers to bloom in time for the lucrative Christmas market. Traditionally they had burnt straw in mid summer on the growing area and for an unknown reason this had the desired effect. Eventually this became uneconomical and they experimented with other methods such as using gas burners and polythene sheeting with limited success, the research continued and it was found that using dowsing rods it was possible to detect the areas that had been burnt over in June when dowsing in January to the exact inch! Experiments found an increase in soil temperature in these areas of plus 2 degrees F. They were able to confirm through research that the dowsing effect was linked to the temperature rise in the soil and that it was long lasting in to the winter. After an unusual period of snow, they came to the conclusion that the dowsing effect caused the temperature rise and was able to protect the plants during cold weather. It was also found that metal could conduct this dowsing effect and could drain it away.

Method

It was now clear the dowsing effect was causing the rise in temperature. Research into dowsing literature was conducted and it was discovered that all that is required is to draw out a five-sided figure, a Pentagon. It can be drawn with a pen on paper, a stick on the ground, or just by marking five points on the ground to form the outline of a Pentagon while walking round a large field or the outside of your home and/or garden. The essential thing is that the first point must be touched again to complete the Pentagon; if even the smallest gap is left no dowsing effect is produced. So check it immediately with your dowsing rods. One Pentagon equals one burning over (see history

above) which produces a temperature rise of 2 degrees F. To gain the maximum temperature rise a total of five pentagrams needs to be created covering the same area and your house and garden will be warmer in 7-14 days with the maximum temperature raise after 14 days. You need to beware that sticking a mercury thermometer or a ferrous metal object into the ground may remove part or all of the dowsing effect as discovered by the Scilly Isles farmers.

Practicalities

I have used this method with other dowsers over the years on and off and usually managed a 2 degrees C temperature increase but haven't always made the 5 Pentagrams. Often it is not possible to walk right around your home on the outside if it is semi detached or a flat for example, in which case draw a plan of you're building then draw in the Pentagon enclosing the area you wish the temperature raised, following the same rules making sure there are five points and they all join precisely then repeat four more times and keep your plan some where safe. Then check with your rods on site to make sure the dowsing effect is detectable on the area covered in your plan.

Action

So there you are, go and try it! It works for the Scilly Isles farmers and helps them get their flowers to market early. The scientific evidence is documented in the booklets already mentioned. There has never been a greater need to cut our heating bills! mail@healthyandwise.co.uk

NEWSLETTERS BY EMAIL

Receiving our newsletters in colour by email saves the trees, and the extra work to print and post. You'll get them earlier too ☺
