## **PRESIDENT'S REPORT**

Right now, in Australia it's hard to feel as though it can really be a Happy New Year! So many of us are working together to change the current weather conditions and resolve the bushfire crisis in Australia. Yet, I continue to trust that you can create a wonderful year for yourself in 2020. Hopefully it will become a year of balance.

I've been reading an Astrology report ([www.starchildglobal.com](http://www.starchildglobal.com)) that talks about many shifts occurring that will break down old structures, making way for new structures. Whilst many say life is not as good as in the 'old days', maybe this is a time for current ways – which are not of benefit to mankind – to collapse and be replaced with some of the good things represented from the past – like love, compassion, appreciation, respect and care for others and our environment.

I feel we need to be quite discerning about media reports and remain as calm and peaceful as possible amidst the present worldwide chaos. I read that: 'The Full Moon and Lunar Eclipse on 10 January initiates the powerful conjunction of the Sun, Mercury, Pluto and Saturn on 12 January, and as the planets align, they bring in the beautiful energy of the Divine Feminine – creative essence to support the changes. Saturn creates form and structure through time and Pluto transforms through breaking down form and structure. In conjunction with Mercury and the Sun, this indicates powerful changes in how we think and how we express ourselves in the world.' This must be good! It's possible that some people will feel upset with structures breaking down and some of us will need to support them towards creating a better future.

The planetary events in January 2020 are actually a rare quadruple conjunction involving Saturn, Pluto, Mercury and the Sun. The previously interrupted ceremony will culminate in the reactivation of the Solar Umbilical Cord of Planet Earth with the Sun, and on deeper levels with the Great Central Sun. This, in turn, will assist in the creation of an archetypical communication between the Sun and Earth, to help us to more fully embrace a 'Golden Age'. Something to really look forward to.

## OUR NEXT MEETING

To commence our DSV year, we are delighted to introduce a speaker who is new to the DSV, Benjamin Turale.

Benjamin was fascinated with the occult world from an early age. He was raised in the 'goldfields' area near Ballarat, Victoria. As a teenager, he dabbled in western magical practices. After a healing crisis in his 20s he embraced Buddhism and temporarily became a Buddhist monk.

He went on to qualify as a transpersonal therapist and then returned to western mystery traditions and alchemy through Carl Jung. Benjamin then encountered a true alchemy teacher and certified as a teacher at the International Alchemy Guild.

Happily, Benjamin is creating an entirely new presentation for the DSV titled, 'Synchronicity, Alchemy and Magick'. His presentation to us will be an exploration of universal principles that govern the connections between the mind, body and the effect that consciousness has on our reality.

Benjamin's topics surely speak to all of us dowers. Be sure to bring your friends along. We look forward to seeing you on Sunday 16 February.

## OUR LAST MEETING

DSV Life Member, Mary Ward, presented at our November meeting on 'Imagery and Music'. She shared many stories from her great experience as a Sound & Music Therapist, explaining that the whole body and mind are affected by music and sound.

Mary had many wonderfully successful outcomes in helping to bring people into balance with her therapy work. She found it particularly beneficial when working with head-injured people.

Mary then led the DSV meeting with some specially selected recorded music and invited everyone to join in an experiential experience. The aim was to reach a quiet state and allow for each person's subconscious mind to gently explore life reflections, in response to the music. Afterwards many shared interesting observations as a result of the exercise.

## INTERNATIONAL DOWSING CONFERENCE 2019

*By DSV President, Lyn Wood*

Early in November last year I attended the International Dowsing Conference run by the NSW Dowzers, in Sydney. There were speakers from Scotland, Ireland, Hong Kong, New Zealand and Australia. Topics covered were Geopathic Stress, EMRs, Past Lives, Communicating with Nature Spirits, Creating Sigils, and details on How to build a Labyrinth, among others.

I met some lovely people and it was great to make contact with them. The Conference Committee, members of the NSW Dowzers Committee, had been busy for two years organising the event.

## DOWSING FOR BRONSON

*Thanks to DSV President, Lyn Wood*

On my way to Sydney for the International Dowsing Conference in Sydney last November, I had a call from a man worried about his dog, Bronson, a young rottweiler. The vets couldn't tell him why the dog was limping on his left foot and somebody had suggested he ask a dowser.

I asked a couple of other DSV dowsers, Bev Ellison and Chris Gerrett, to join me for the task. Bev googled a photograph of a dog's skeleton which she dowsed for answers, and Chris worked intuitively.

We all received indications that there were problems with Bronson's skeleton, possibly the composition of his bones and lack of minerals. We felt that using Australian Bush Flower essences, tissue salts and introducing food with less preservatives could be of help. However not being experts, we couldn't pinpoint the exact problem. We knew he was not a happy dog, and neither was his owner, so keen to find a solution and having already spent a fortune to help him.

I rang recently to get an update on the rottweiler and learned that an arthroscope on his left shoulder showed a problem with ligaments. Poor Bronson needs more work to bring about his full recovery, but he's in very good hands with his devoted owner.

## DOWSING ON PAST LIVES

*Thanks to DSV Committee Member, Bev Ellison.*

To apply dowsing to past life discovery, I feel it's important to understand some simple aspects of human energy. We each have an energy system. We are comprised of a wide variety of energy emanations and fields. These include, but are not limited to, light, sound, electricity, magnetism, heat and so on. We leave traces of our energy everywhere. The more sustained our contact with a particular area, the stronger our energy affects it.

The theory in past life discovery is that we have left strong energy traces at points in time and space where we have had other lives. When we dowsing for those past lives, we are using our tools to attune to those distant traces. Just as migrating birds make and follow a particular path that they can recognise, our lives have also followed a track and there are markers that we can use to trace the course of our own journey. Those markers are our past lives. This idea is similar to the concept of ley lines.
