DSV philosophy: Through awakening consciousness, we are empowered with knowledge and skills to unconditionally serve others

Sunday 18 April 2021

PRESIDENT'S REPORT

It was so good to see fellow dowsers in person at our February 2021 meeting, the first since we last met a year ago in 2020. After that of course, we were closed down due to the lockdown restrictions relating to Covid 19.

While Monash management kindly allowed us to gather in the main hall for easier distancing, we felt rather too spaced apart, so it didn't have the cosy feeling of our usual room.

Happily restrictions in Victoria have now eased dramatically as we're blessed that there have been no new cases of Covid in our state for such an extended period. As a result, we expect to return to our regular meeting room.

We can celebrate the fact that no masking is required for our April meeting, which is such a relief for so many. (Presently, masks are only required on public transport, including taxis and planes.) However, for our meeting we still need to record details of who attends and also encourage use of hand sanitiser.

We will hold a short Annual General Meeting at the beginning. I'm trusting that we'll have two members decide to join us and share their ideas and areas of expertise. I urge you to have a think about coming onboard with us. We held our February Committee meeting via Zoom last month, which was such a success, we plan to continue conducting online meetings to meet as a Committee. That overcomes the need for such an early start on DSV Meeting days, which is helpful when everyone's so busy.

George Williams DSV Founder

Lyn Wood, President

Many years ago our founder, George Williams offered brief dowsing tuition before DSV meetings, and we'd like to return to doing that again for beginners, at 1.30 pm, ahead of our meetings.

I plan to also run a longer, more advanced dowsing workshop on a Saturday, at Beaconsfield. Just let me know if you'd like to take part and I'll lock in a date to suit.

We hope you will come along for some dowsing inspiration and take full advantage of being able to mingle and meet again freely with like-minded people – both new and old dowsing friends.

Lyn Wood, *President*

Zoom meetings are just modern seances

'There's someone who wants to join us.'
'Elizabeth, are you there?'
'We can't hear you.'
'Can you hear us?'

MEETING DETAILS

Time & Date:

1.45 pm for 2.00 start, Sunday 18 April 2021

Place:

**Mount Waverley Community Centre,
Miller Crescent, Mount Waverley**

(Opposite Mount Waverley Railway Station) Melways: 70 E 1

Parking at rear, off Holskamp St. which runs off Stephenson's Road

OUR NEXT MEETING

We aim to keep the formalities short at our AGM on Sunday 18 April. We're all keen to move onto the day's main feature. To be eligible to vote or nominate for the DSV Committee, you need to be a paid-up member. We invite you to consider standing for a position yourself.

New ideas and new energy are always welcome at the DSV. It is important for our future that we have new people joining us to allow those needing to step aside from the DSV Committee to do so more easily.

We're a friendly bunch and joining us gives you the opportunity to contribute directly to the DSV to learn and share.

We're always grateful to receive updates from a DSV favourite, international dowser, Raymon Grace. He has just shared a new, full-length video from his February 2021 presentation to the Lone Star Dowsters in the US and has given us permission to screen it publicly on 18 April.

In this new film he provides so many fascinating insights into dowsing.

You'll enjoy some great, practical reminders to help with your dowsing, as well as some of his newer thoughts to help keeping your dowsing knowledge and practices expanding.

It would be great if you can bring someone along to also benefit from this video. Hope to see you there with a friend or two.

OUR LAST MEETING

As your friendly Vice-President and Newsletter Editor, I presented at the February DSV meeting.

I led with Dowsing Protocols to help ease the effects of the covid situation and provided some other tools to help overcome stress in general, whenever it arises.

FasterEFT-style meridian Tapping combines really well with Dowsing to help overcome doubts about trusting answers.

Bi-lateral Stimulation is a very useful tool to synchronize brain activity – activating both brain hemispheres to the same frequency.

It spreads blood and electrical impulses to flood areas of association in the brain to diffuse anxiety and enable more clarity in thinking.

I gifted some smiley balls for people to take away as a reminder to pick one up (*or a small piece of fruit such as an orange, an apple or a lemon*) in order to use this technique regularly.

Here is a short video of New York Hypnotist, Melissa Tiers, doing a demo of The Ball technique.

Can be used standing or sitting. Perfect for any time, in front of a computer, in a garden, etc.
<https://www.youtube.com/watch?v=3Sy9YGeNjCI>

It's a good idea to use your "ball" each morning to make things easier each day.

At the end of the meeting, we showed a couple of Raymon Grace's short videos.

GEOPATHIC STRESS AND CANCER

Thanks to DSV member, Bev Ellison for another welcome contribution. Article printed with permission from Nexus Magazine, sourced originally from "Healing Cancer Naturally", 2004.

1929: In January, German scientist Baron Gustav von Pohl, a talented dowser who believed that Earth radiation affected tree growth, animal behaviour and human health, set out to prove officially that cancer deaths only occurred in people who had been sleeping in beds positioned above a powerful water vein (underground stream).

1930: The Berlin Centre for Cancer Research accepted von Pohl's findings and published the information in its July journal positing that Earth radiation could be a causative factor in cancer.

Baron von Pohl wrote a book (Earth Currents as Pathogenic Agents for Illness and the Development of Cancer) on his work, and a number of German doctors began working with the material to help their patients.

1950s: German medical doctor Ernst Hartmann, MD, spent decades researching the phenomenon. He found that if people worked or slept over the meridians of Earth energy, they could suffer from heart attacks, insomnia, chronic asthma, migraines, backaches and cancers.

1970s: Austrian school teacher and dowser Kathe Bachler started one of the most extensive research projects into the Earth radiation phenomenon. Working in collaboration with medical doctors, Bachler dowsed over 3,000 sleep and work places in 14 countries, interviewing 11,000 people. In next to all unexplainable cases, they found Earth rays to be the cause of the disease.

Not only did Bachler find that 95 per cent of the "problem" children who she'd investigated slept in beds or worked at desks placed at

harmful sites, but she also checked 500 cancer cases: every person was found to be sleeping over harmful radiation.

1985: Veronica Carstens, MD, the wife of Karl Carstens, a former President of Germany, published a study stating that there were 700 cases documented worldwide in which terminally ill cancer patients regained their health without any conventional treatment after their sleeping area had been moved from a geopathic stress zone. All of these cancer patients had been "given up on" by their doctors.

[In recent times, we've come to recognise that uncleared non-beneficial energies and seemingly "last straw" events and reactions to them - 18 to 24 months prior to diagnosis - can have a direct effect on people experiencing serious illnesses. Editor. Lyn Wood also points out that these days we know to dowse to change the frequencies of the various harmful lines - something which wasn't apparently known to other dowsers in the past.]

DOWSING AND EFFECTS OF EARTH RADIATION

Thanks to DSV member, Bev Ellison for this welcome contribution. Article printed with permission from Nexus Magazine, originally written by Harold Tietze (dec).

Earth radiation is part of the natural environment and it influences all living organisms.

The civilisations of Africa, Asia, South America and Europe recognised Earth radiation and made allowances for it in their daily activities. In China, it is an old custom, dating back thousands of years, to determine suitable positions for new buildings with expert diviners. The ability of Earth rays to slow down the process of decomposition was used by the Egyptians for mummification. Old Germanic and Scandinavian legends frequently mention the use of the divining rod. Then in the Middle Ages, divining for Earth radiation was rejected as superstition.

Only since the beginning of the 20th century have the far-reaching effects on health of this radiation been recognised again. Although Earth radiation is a contributing factor in disease, it also has positive effects. It stimulates and activates our physical and spiritual reserves. Our ancestors erected their places of worship over zones of radiation, and this is a practice still followed today by more “primitive” people.

The most detailed statistical evidence so far in regard to Earth radiation has been established for cancer. Over the years, I have observed many people who, according to my theory, should have enjoyed good health but did not. My assumption was based on their natural diet, sufficient exercise and emotional wellbeing, and many were living in a rural coastal, relatively unpolluted environment along the East Coast of Australia.

[As Lyn Wood points out, we are fortunate today to be able to use our dowsing skills to change frequencies, as needed.]

READY TO BECOME OUR NEXT DSV NEWSLETTER EDITOR?

We are still actively seeking a new Editor to take over my role for the DSV Newsletter.

I am grateful that DSV Committee Member Bev Ellison has been helping me so much by sourcing articles to lighten the load. It certainly makes life so much easier!

I invite you to share something of your own dowsing experiences for the DSV Newsletter. You can remain anonymous if you prefer.

Alternatively you can send me interesting information you've come across, provided you've requested approval to reprint it. Just email me: heather@ohnaturale.com (Ed.)

THE DSV SHOP

Now that we're able to hold meetings again, rest assured we're well stocked with many different dowsing books and dowsing instruments, including Mick Moran's hand-made dowsing rods and also, Raymon Grace's bobbbers.

You can choose from a wide selection of books, DVDs, and CDs too.

This is an EXTRACT from the April 2021 DSV Newsletter. By becoming a DSV member, you'll receive six full copies a year. Download a Membership form on the Home Page of this site.

The next DSV meetings : 18 April 2021, 20 June 2021 (Later dates TBA.)
